

CEILING IP LOUDSPEAKER

RCS6-IPM

The RCS6-IPM is a 20 Watts ceiling IP loudspeaker for voice, paging, intercom, music streaming, audio routing, pre-recorded and scheduled announcement, VoIP communication or as the SIP endpoint where network-wide communication is desired and high-output loudspeakers are required to overcome high ambient noise and/or large spaces.

The RCS6-IPM incorporates 3 control inputs for level control and source selection (using the RAC 5/8 controllers), 1 contact output for triggering events. The IP speaker also comes with a built-in microphone input, allowing hands-free intercom. The YMC0101-004 microphone capsule could be connected to this microphone interface.

To configure, control, monitor the IP speakers in real-time, this can be easily done through your favorite web browser interface, making the management even the most complex environments simpler than ever.

● Features

Support PoE+ and/or connect to 24 VDC power adapter (if PoE+ is not available)

Cost effective and simple installation with single cable deployment

Easily configured, controlled, managed and monitored via web browser

IP based for music streaming, routing, paging and control over LAN/WAN

Full DSP includes AEC, NR, Ducker, AGC, PEQ, Hi/Low Pass, Compressor, Limiter, etc.

INSTALLATION GUIDE

RCS6-IPM

Side view
(unit: mm)

1) Cut the required hole for the speaker.

2) Loosen the retaining sliders and push to the top of the bracket. Once the bracket is through the hole pull down the sliders and tighten the retaining nut clamping the ceiling.

3) FITTING THE SPEAKER

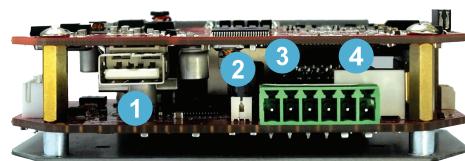

Compress "V" spring and fit into the retaining ear within the bracket. Connect cables to the speaker.

4) Fit second "V" clip into second retaining ears and gently push the speaker up into the bracket (do not push the central perforated grille area) the speaker will self locate into the bracket.
