

WALLMOUNT SPEAKER, WOODEN HOUSING

WWC6/T

With its Softline design, the WWC6/T is a combination of modern design and more convincing power. Due to its high-quality, low-resonance wooden housing, including a rear wall fastened with screws, in combination with a ball-protected Zinkor steel sheet grid, the WWC6/T withstands even the most critical eye.

The WWC6/T is ideal for music and voice transmission. It can be mounted on solid ceilings as well as on walls.

The wall-mounted loudspeaker WWC6/T is supplied with mounting hardware.
